Detailed Description of the Collection

Box

1. Correspondence and Non-Dunitz Publications, 1932-2009 undated (26 boxes)

The folders in this series contain correspondence and publications by specific authors, as maintained by Dunitz. The correspondence materials include traditional letters as well as a large volume of emails and word processing files printed out over time by Dunitz. Highlights of the series include lengthy exchanges with a number of notable scientists including Carleton Gajdusek, Dorothy Hodgkin and Kenneth Trueblood. The activities of the Cambridge Crystallographic Data Centre are also well-documented in this series, as is Dunitz's work in preparing his *Biographical Memoirs of the Royal Society* article on Linus Pauling.

Access to the Cambridge Crystallographic Data Centre and the Royal Society correspondence in Series 1 is restricted due to the presence of confidential information. All requests for access to this material should be directed to the University Archivist.
