  - 1639-1681 General Alumni; Campus Views, Buildings, etc. (slides).
  - 1682-1683 Education Hall (slides).
  - 1684-1688 From the School of Pharmacy. What follows is taken from an attached sheet:

for the 35mm kodachrome slides.

the slides are numbered and correspond with the presentation listed below.

Pharmacy exists to serve the public. Pharmacy is one part of the total medical picture. The five-year curricula leads to degrees of Bachelor of Arts, or Bachelor of Science, and graduate work leading to degrees of Masters of Arts or Masters of Science and Doctor of Philosophy are offered by the School of Pharmacy.

(1) tablet manufacturing and coating is a part of the total training in manufacturing pharmacy.

(2) the use of many sensitive and expensive pieces of equipment is necessary to properly determine the exact composition and strength of the various pharmaceutical.

(3) each student has the necessary equipment and space assigned to him in the dispensing laboratory. Nothing is more important to the pharmacist than accuracy, this is followed very closely by neatness.

(4) the senior students compound prescriptions. The types of these prescriptions filled and the medication used follow the trends of up-to-date prescribing.

(5) the State Board of Pharmacy examines all graduates. Before a

student can become a registered druggist, he must successfully pass the Oregon Board of Pharmacy Examination which is given each year after graduation in June.

(and a note is scrawled in the bottom of the page)

Daltas -- whatever needs to be done with this to get it to the right group, you please do. Herman.
