

Guide to the Ewan Cameron Papers, 1935-1997

Title

Ewan Cameron Papers (MSS Cameron)

Dates

1959-1994 (inclusive)

Creator

Cameron, Ewan, b. 1922.

Summary

Ewan Cameron (1922-1991), was a physician and researcher who, for many years, collaborated closely with Linus Pauling in studying the potential benefits of treating cancer with megadoses of vitamin C. His papers contain many of the personal and official letters, research notes, manuscripts, and scientific offprints that he and his estate accumulated over the years 1959-1994, with the bulk dating to his time of affiliation with the Linus Pauling Institute of Science and Medicine, 1971-1991.

Finding aid prepared by Chris Petersen and Erin F. Haynes, March 2003.

Funding for encoding this finding aid was provided through a grant awarded by the National Endowment for the Humanities.

Dr. Ewan Cameron was born in Glasgow, Scotland July 31, 1922. He received his medical degree from the University of Glasgow in 1944, and immediately joined the British Army, where he served as a medical officer in Burma for three years. A gifted surgeon, Cameron worked as a Consultant Surgeon at Vale of Leven Hospital in Dunbartonshire, Scotland, from 1956 to 1982, becoming the Senior Consultant Surgeon in 1973. He received the Queen's Coronation Medal in Britain in 1977, as well as fellowships from the Royal Colleges of Surgeons in Glasgow and Edinburgh, and the Royal Faculty of Physicians and Surgeons in Glasgow. In 1966, Cameron published his first book, *Hyaluronidase and Cancer*.

In 1971, Cameron began corresponding with Dr. Linus Pauling of the Linus Pauling Institute of Science and Medicine. He completed many scientific studies in conjunction with the institute, and published *Cancer and Vitamin C* with Pauling in 1979. After retirement from Vale of Leven Hospital in 1982, Cameron was invited to become Medical Director and Senior Research Professor at the Linus Pauling Institute, where he worked closely with Pauling on many important research topics. Cameron had a son and a daughter with his first wife, Phemie. After her death in 1985, Cameron married Connie, who survived him after his death on March 21st, 1991.

Timeline for Ewan Cameron

- 1922 Born in Glasgow, Scotland on July 31.
- 1943 Begins a two-year period of student internships in surgery and medicine at several Scottish hospitals.
- 1944 Receives bachelors degrees in medicine and chemistry from the University of Glasgow. (These degrees are equivalent to the North American M.D. degree)
- 1945 Begins his three-year Army service in Burma. For twenty years following his discharge from active service, Cameron will remain a Lieutenant Colonel in the British Army Reserve, under the title Senior Surgical Specialist.
- 1948 Continues his surgical training in the Stirling Royal Infirmary and the Royal Infirmary of Edinburgh. Is also appointed Surgical Registrar at the Western Infirmary of Glasgow, serves for six-months with the Department of Radiotherapy, and assumes teaching duties at the University of Glasgow.
- 1949 Qualifies as a Fellow qua Surgeon of the Royal Faculty of Physicians and Surgeons, Glasgow.
- 1950 Named a Fellow of the Royal College of Surgeons of Edinburgh.
- 1952 Named Senior Surgical Registrar at the Royal Alexandra Infirmary in Paisley, Scotland, where he will remain for four years.
- 1956 Accepts a position as Consultant Surgeon, (aged 33, he is the youngest Consultant Surgeon in all of the United Kingdom) and later Senior Consultant Surgeon, at Vale of Leven District General Hospital in Dunbartonshire, Scotland. Cameron's formal association with the Vale of Leven Hospital will last until 1982. His early research interests focus on the diagnostic and prognostic value of serum glycoprotein concentrations in patients afflicted with an assortment of diseases, including cancer.
- 1963 Named a Fellow of the Royal College of Surgeons of Glasgow.
- 1966 Publishes the book *Hyaluronidase and cancer*, New York: Pergamon Press. Cameron's book advances the theory that the malignant invasiveness of cancer cells might be combated by manipulating hyaluronidase inhibitor, a naturally-occurring substance that controls the hyaluronidase enzyme liberated by malignant tumors. The theory, which Cameron has been developing for at least eleven years, is founded on the notion of fighting cancer through the strengthening of the human body's natural protective mechanisms.
- 1971
- 1971 With Linus Pauling, publishes "Ascorbic acid and the glycosaminoglycans: an orthomolecular approach to cancer and other diseases," *Oncology*, 27: 181-192. This is the first in a series of ten papers that Cameron

- and Pauling will publish over the next nine years on the potential value of vitamin C in the treatment of cancer.
- 1974 Begins a six-year term as Chairman of the District Medical Advisory Committee of the Argyll and Clyde Health Board, Scotland.
- 1975 Named Honorary Consultant in General Surgery to the Royal Navy in Scotland.
- 1977 Receives the Queen's Coronation Medal.
- 1978
- 1979
- 1982 Appointed Medical Director and Senior Research Professor at the Linus Pauling Institute of Science and Medicine, Palo Alto, California.
- 1983 With colleagues at the Linus Pauling Institute, begins actively researching the potential use of vitamin C in the treatment of AIDS.
- 1991 Dies on March 21, of prostate cancer. He is survived by his second wife, Constance, as well as a son and a daughter from his first marriage to Phemie Cameron, who died in 1985.

Arrangement

The Cameron Papers are arranged into thirteen series. Each series is organized either chronologically, alphabetically or by subject, as appropriate.

Content Description

The collection includes dozens of boxes of material from research initiatives that Cameron conducted, including study proposals, grant applications, funding information, notes, manuscripts, and published papers. Cameron's correspondence with a number of colleagues, most notably Linus Pauling, is likewise included in the collection, as are smaller sets of biographical content, including Cameron's awards.

Preferred Citation

Courtesy of the Ewan Cameron Papers, Oregon State University Libraries Special Collections.

Acquisition Information

The papers were donated to Special Collections by the Linus Pauling Institute in 2000 and 2001, with the bulk accession occurring in July 2000.

Processing Note

Preliminary arrangement by Erin F. Haynes. Final arrangement by Chris Petersen.

Related Materials

Ewan Cameron and Linus Pauling's lengthy collaboration is documented in many locations throughout the [Ava Helen and Linus Pauling Papers](#). Researchers are particularly advised to note the Pauling-Cameron correspondence files contained in Correspondence boxes 58-61, the Linus Pauling Institute of Science and Medicine records held in Correspondence boxes 223-277, and the large volume of material related to the book *Cancer and Vitamin C* and the unpublished *AIDS Disaster* manuscript in the Manuscripts and Typescripts of Books series, boxes 14.001-14.010 and box 18.001.

Detailed Description of the Collection

Box

1. Mice Cancer Experiments, 1970-1997 (10 boxes)

These materials document a set of mice experiments that Cameron carried out in collaboration with Dr. Jeff Bland and Dr. Richard Marcuson that explored the effects of dietary fatty acids on incidences of breast and colon cancers. The serie includes a wide range of records, from experiment proposals and descriptions, to budgets, data sheets, correspondence, manuscripts and related articles. The boxes are arranged according to the stage of a given experiment, with files organized by date, as applicable.

3. Institutional Information and Correspondence, 1959-1992 bulk 1974-1987 (4 boxes)

Cameron received information and documents from many different institutions, and corresponded with some of them. This series organizes institutional correspondence and information alphabetically by name of institution. The fourth box in the series contains information and notes from conferences attended by Cameron, organized by sponsoring institution name, or by the name of the presenter.

4. Cameron Speeches and Presentations, 1979-1987 (1 box)

This small series contains manuscripts and typescripts of speeches and presentations delivered by Cameron. Note that the full text of item 4.001.3, "Vitamin C and Cancer: A Personal Perspective," is [available here](#).

4.001 Speeches and Presentations, 1979 1982 1984 1986-1987

- 1.1 Materials re: Cameron and Pauling appearance on KGO radio, San Francisco, California, 1979., 1979

- 1.2 Materials re: "The Role of Vitamin C in Resistance to Cancer", Reggio Calabria, Italy, April 4, 1982., April 4, 1982
- 1.3 Materials re: "Vitamin C and Cancer: A Personal Perspective", delivered at Symposium: Nutrition, Health, and Peace, San Francisco, California, September 29-30, 1984., September 29-30, 1984
- 1.4 Materials re: "Vitamin C and Cancer: The Scottish Studies and Beyond", delivered to the Huxley Institute for Biosocial Research, San Francisco, California, June 28, 1986., June 28, 1986
- 1.5 Materials re: "Nutritional Factors in Cancer Control", delivered at Symposium: Innovative Methods in the Prevention and Treatment of Cancer, San Francisco, California, November 19, 1986., November 19, 1986
- 1.6 Correspondence re: Cameron presentations, July 16, 1987

Box**5. Articles, Papers, and Periodicals, 1935-1993 (32 boxes)**

This series is comprised of Cameron's collection of scientific offprints, including those written by others and by himself. The materials are further divided into five subseries, each containing articles of various types.

Boxes 5.001 to 5.006 include only those articles written by Cameron, the majority of which pertain to Vitamin C. Box 5.007 holds articles both by and about Dr. Linus Pauling, Cameron's major collaborator. Boxes 5.008 to 5.016, which comprise the largest of the subseries, are devoted to scientific articles of all kinds, mainly dealing with Vitamin C and other medical topics, and organized alphabetically by author's last name, or by title in cases where no author is evident. Boxes 5.017 to 5.020 contain articles not published in scientific journals, organized by topic. Many of these topics are of a medical nature, and most of the topic names were derived directly from the organizational scheme of Cameron's own filing cabinets. Boxes 5.021 to 5.023 include periodicals that Cameron received, filed alphabetically by publication name.

- 5.001 Vitamin C Articles and Manuscripts by Ewan Cameron (Titles: A-G), 1973-1974 1976 1979
 - 1.1 Materials re: "Ascorbate and Cancer" [co-author Linus Pauling], *Proceedings of the American Philosophical Society*, 123, 2, April 1979., April 1979

9. General Correspondence, 1968-1994 (29 boxes)

Cameron was a public figure. Because of this, many people saw fit to write to him to seek his advice on vitamin C and medical issues, belittle his findings or, alternatively, express their appreciation of his life and work. The General Correspondence series contains correspondence written either by people whom Cameron did not know personally or by those who did not write often enough to merit their own file.

Box**11. Other Colleagues: Individual Correspondence and Articles, 1968-1989 (5 boxes)**

Many of the letters that Cameron received were from fellow scientists and colleagues. Series 11 contains correspondence from those colleagues with whom Cameron exchanged letters most often. It also includes Cameron's communications with Arthur B. Robinson, a key member of the Linus Pauling Institute of Science and Medicine, who later left the Institute under unhappy circumstances. Much of the correspondence in this series is arranged by date, and also includes information and articles by and about the correspondents.

Box

12. Affiliations, Research Proposals and Grant Records, 1965-1991 (12 box)

This series documents Cameron's affiliations with organizations and institutions, including the Linus Pauling Institute of Science and Medicine. It is divided into six subseries, each focusing on either a different institution or on other official matters of concern to Cameron, such as research proposals and funding.

One subseries is devoted entirely to documents pertaining to grants, the primary source of funding for Cameron's research. Boxes 12.001 to 12.003, which chronicle Cameron's interactions with the Pauling Institute, and boxes 12.004 to 12.005, which contain materials related to the National Foundation for Cancer Research, both include information about the specific institution as well as documents illustrating their affiliation with Cameron and correspondence with various members of each organization.
