

## Extension Bulletin Illustrations Photograph

Box Number	Image Number	Description
Box 01	385	Red Salmon (adult female) [glass negative]
Box 01	386	Dog Salmon (breeding female) [glass negative]
Box 01	387	Dolly Jarden Trout (adult female) [glass negative]
Box 01	388	Alaska Cutthroat Trout (adult female) [glass negative]
Box 01	389	Silver or Coho Salmon (breeding male) [glass negative]
Box 01	390	Red Salmon (adult male) [glass negative]
Box 01	391	Humpback Salmon (breeding male) [glass negative]
Box 01	392	Dog Salmon (breeding male) [glass negative]
Box 01	393	Chinook Salmon (adult male) [glass negative]
Box 02	379	Fish from 1906 lithograph [glass negative]
Box 02	380	Steelhead Trout [glass negative]
Box 02	381	Humpback Salmon (adult female) [glass negative]
Box 02	382	Humpback Salmon (breeding female) [glass negative]
Box 02	383	Silver or Coho Salmon (adult male) [glass negative]
Box 02	384	Humpback Salmon (adult male) [glass negative]
Box 03	395	Home-made Duster on car. Jackson County, ca. 1936
Box 03	396	Pruning Tools
Box 03	397	Threshing grass seed
Box 03	398	Cattle in pasture
Box 03	399	Harry Schoth in Alfalfa Field Demonstration, ca. 1939
Box 03	400	George Hyslop in Alfalfa Field Demonstration, ca. 1939
Box 03	401	Truck loaded with cotton for the Mattress Program
Box 03	402	Making Home-made Liquid Lime Sulfur with will equipped installation, ca. 1932
Box 03	403	Making Home-made Liquid Lime Sulfur with limited equipment, ca. 1932
Box 03	404	Abandoned Apple Orchards Being Removed, ca. 1932
Box 03	405	Fruit Growers Attending Spray Demonstration
Box 03	406	Federation Wheat Near Central Point, Jackson County, ca. 1928
Box 03	407	Range Cows and Calf Crop - Ashland, ca. 1928
Box 03	408	Hogs on Alfalfa Pasture, Jackson County
Box 03	409	Filling Concrete Silo, Jackson County, ca. 1928
Box 03	410	Alfalfa Hay - 4 Tons per Acre
Box 03	411	Spreading Alfalfa Hay in November, ca. 1930
Box 03	412	Trenching in Manure, ca. 1929
Box 03	413	Tile Trenching Machine, ca. 1929
Box 03	414	Method Demonstration Meeting, Drainage
Box 03	415	Registered Herefords and Calf Crop, ca. 1929
Box 03	416	Grangers Gathered to Reseed Land, Applegate District, ca. 1930
Box 03	417	Herd of Cows
Box 03	418	Bean Fruit Washing Machine, ca. 1926
Box 03	419	Scheu heaters in Modoc orchard
Box 03	420	Field of Baart wheat

Box 03	421	Farm Bureau Picnic, ca. 1920
Box 03	422	Farm Bureau Picnic, ca. 1920
Box 03	423	Schere Bartletts, ca. 1915-1920
Box 03	424	Comice pears on Hollywood orchards
Box 03	425	J.R. McCracken and Dairy Herd of Ashland, ca. 1919
Box 03	426	Farm Bureau Exchange Warehouses, ca. 1920
Box 03	427	Farm Bureau Exchange, Medford, Oregon, ca. 1920
Box 03	428	Office Force of the Farm Bureau Exchange
Box 03	429	Dicing with horses
Box 03	430	May Day, ca. 1920, no print
Box 03	431	Hereford cattle
Box 03	432	Registered Herefords
Box 03	433	Registered Shorthorns, ca. 1919
Box 03	434	Shorthorn Auction Sale
Box 03	435	Shorthorn Auction Sale, Medford, Oregon, ca. 1919
Box 03	436	Loading Nitrate of Soda from touring car into boxcar
Box 03	437	Early truck and boxcar
Box 03	438	Horse and wagon and boxcar
Box 03	439	Girls picking in Comice orchard, ca. 1918
Box 03	440	Picking crew, Jackson County, ca. 1918
Box 03	441	Thinning crew, Jackson County, ca. 1918
Box 03	442	Medford, Oregon
Box 03	443	Disc harrow used by orchardist
Box 03	444	Pathologist in laboratory
Box 03	445	Entomologist in laboratory
Box 03	446	Office of Jackson County Pathologist
Box 03	447	Horticultural Inspection force standing beside their autos, ca. 1915
Box 03	448	Horticultural Squad; C.C. Cate, County Pathologist; C.A. Noren, Asst.; A.C. Allen, Hort. Com.; J.C. Aitken, E. Oatman, C. Martin, & Ross Cline, Inspectors
Box 03	449	Pears
Box 03	450	Wood Piled for Smudging
Box 03	451	Stove wood burner
Box 03	452	Instrument shelters
Box 03	453	Smudge pots
Box 03	454	Smudge pots burning
Box 03	455	Smudge pots burning at night
Box 03	456	Smudge pots in orchard
Box 03	457	Smudge pots being lit with gasoline torches
Box 03	458	Dicing
Box 03	459	Threshing Bent Grass Seed
Box 03	460	Land being leveled
Box 03	461	Oregon Turkey Growers Plant, ca. 1938
Box 03	462	Young turkeys and range house
Box 03	463	Roseburg cheese factory
Box 03	464	Making a cotton mattress
Box 03	465	Dill

Box 03	466	Corn harvester and tractors
Box 03	467	Corn picker
Box 03	468	Douglas County, ca. 1940
Box 03	469	Dusting machine drawn by horses
Box 03	470	Harvesting Prunes
Box 03	471	Stripping land for irrigation with horses
Box 03	472	Truck being loaded at packing plant
Box 03	473	Drainage Ditch
Box 03	474	Drainage Outlet
Box 03	475	Ditch draining Swamp
Box 03	476	Natural Drainage Outlet Straightened
Box 03	477	Turkey
Box 03	478	Field Corn and Sunflowers grown for Silage
Box 03	479	Land being fitted for border-strip irrigation
Box 03	480	Riverdale Grange Hall
Box 03	481	Tent Caterpillars
Box 03	482	Dust being applied
Box 03	483	Gully
Box 03	484	Soil erosion
Box 03	485	Threshing Grass
Box 03	486	Threshed Grass Seed
Box 03	487	Dressed Turkey
Box 03	488	Grading dressed turkeys
Box 03	489	Prize winning turkeys
Box 03	490	Melon packing plant at Melrose
Box 03	491	Harvesting peas with horses, ca. 1929
Box 03	492	Cow-drawn cart
Box 03	493	Insulated egg storage room, ca. 1930
Box 03	494	Bee Smokers
Box 03	495	Docking lambs
Box 03	496	Blast at Ditching Demonstration
Box 03	497	Horse-drawn mower
Box 03	498	Pump irrigation outfit, ca. 1918
Box 03	499	Irrigation outfit, ca. 1917
Box 03	500	Irrigated field, ca. 1917
Box 03	501	Early automobiles
Box 03	502	Early cultivator
Box 03	503	Bank of Commerce, ca. 1916
Box 03	504	Sorghum Field
Box 03	505	Professor Millward with Lane County growers
Box 03	506	Corn in stocks, Lane County, ca. 1918
Box 03	507	Picnic, University of Oregon, ca. 1919
Box 03	508	Agents visiting a farm
Box 03	509	Sunflowers for silage, ca. 1919
Box 03	510	German prisoners of war picking beans, Willamette Valley
Box 03	511	Soldiers on furlough picking hops

Box 03	512	Men from U.S. Naval Hospital, Camp Adair, Benton County, Oregon hoeing Creeping Red Fescue Grass
Box 03	513	Store exhibits an aid to Recruitment. One of many window displays used in store windows during emergency need for bean pickers in Marion County. Sign describes the job: free transportation, high wages, average \$6 to \$8 per person per day, average \$20 to \$30 a family per day, good camping accommodations. In the background are posters of army recruitment.
Box 03	514	A roadside sign used effectively throughout the harvest season in Marion County calling for employment
Box 03	515	Weighing time in the bean fields for a mixed platoon of WLA and youth workers. Bean sacks are weighed at the end of the day or when moving the crew to another field. Many looked hot and tired.
Box 03	516	O.S.C. co-eds stake hops on Saturdays during Spring quarter
Box 03	517	Barrels of cucumber pickles harvested by Mexicans, Columbia County
Box 03	518	Mexicans harvesting cucumbers, Acreage 401; tonnage 3,372.2; Mexican man hours used 144,525; dollars earned \$116,794.83; lbs. of cucumbers for sour pickles 173,000; lbs. cucumbers for sweet pickles 910,563; lbs. of sweet relish 1,667,061; and lbs. of cucumbers for Genuine dills 4,006,210. Columbia County
Box 03	519	Flag-raising ceremony, Columbia County Mexican farm labor camp
Box 03	520	Platoon and Independent workers loading up in Lane County
Box 03	521	A platoon is having their lunch hour in Lane County
Box 03	522	Millers, one of Salem's department stores, helped promote the Women's Land Army through the bean harvest with this window display
Box 03	523	Women who are part of the "Housewife Special" are boarding a bus to go out and help save Marion County's bean crop
Box 03	524	A street in Merrill Migratory Farm Labor Camp, ca. 1944. Office is tent at left by light pole, Nurses tent next
Box 03	525	Sign near Coburg Camp, ca. 1944
Box 03	526	Coburg Camp Office, Left to right, Glenn Griffith, Manager of Coburg Camp; M.C. Wilson, U.S.D.A.; Dean W.A. Schoenfeld, Oregon State College in front of the office, ca. 1944
Box 03	527	Coburg Camps facilities: laundry shelter, showers, and hot water boiler, ca. 1944
Box 03	528	Family groups picking the beans in Washington County. Mother trains the girls how to pick beans efficiently
Box 03	529	People harvesting peas in Umatilla County, Regular crews of town women worked on the belts where the peas are inspected before going into the cans. Pendleton, Oregon.
Box 03	530	Mexican Nationals pulling onions in Klamath County, ca. 1943
Box 03	531	Mexican Nationals hoeing sugar beets in Malheur County, ca. 1943
Box 03	532	Farm labor supply center for inter-county workers in Coburg, Oregon, ca. 1943
Box 03	533	Pickers leaving Coburg, Oregon camps for the bean fields, Men and women on a truck, ca. 1943.
Box 03	534	Homemade loader picking up baled hay in the field, ca. 1943

Box 03	535	Pea viner preparing peas for cannery, ca. 1943
Box 03	536	Mr. Leonard Grant, government hunter, exhibits the result of his skill in the form of a large cougar, Mr. Grant owns a stock farm in the Harlan area.
Box 03	537	Two types of Indian shell mound at Ten-mile Creek south of Yachats. Low mounds covered with sod are almost pure shell, with very little mixture
Box 03	538	Low mound at Ten-mile Creek south of Yachats, Very little mixture
Box 03	539	Close-up of shell deposit material, Individual shells are partially decomposed, break up with handling
Box 03	540	Skunk cabbage and buttercup in pasture, at time spraying was done with 2,4-d, Skunk cabbage was controlled, buttercup showed only temporary effect. Treatment in April, Watter Kiser farm, Taft.
Box 03	541	Soil fertility is reflected by heavy production in Malheur county, Onions for war needs, ca. 1942
Box 03	542	Visual evidence of the size of Malheur County and of the area served by the county agents' office. This picture shows the county agent studying a roadway sign post in southwestern Malheur County while on a trip to determine the area infested with Mormon Crickets and to arrange for control measures where necessary. The sign board points to Jordan Valley, 92 miles away and Jordan Valley is still 95 miles from Ontario where the office is located. On this particular three day trip, nearly 600 miles were covered, all in Malheur County, only about 15 miles of the same road was retraced and 19 farms or ranches were visited. Malheur County is 168 miles long and 66 miles wide as the crow flies, has a total area of 6,325, 120 acres, has 2884 miles of public roads and approximately 2500 farms, ca. June, 1939
Box 03	543	Hybrid Corn Growing contest in Malheur County, 1939. The picture is of E.R. Jackman harvesting corn in hybrid growing contest, H.N. Black Farm, Oregon Slope in October 1939.
Box 03	544	Seed cleaning plant purchased by Malheur County farmers and Blue Mountain Seed Growers Association, 1940. The organization of the cooperative to purchase this plant was one of the major activities of the county extension office in 1940. This plant contains the most up-to-date seed cleaning equipment to be found in the Lower Snake River Valley, This building and equipment cost nearly \$30,000. This plant cleaned over two million pounds of seed in 1938.
Box 03	545	Effect of excluding insects from red and ladino clover, ca. July, 1940. The screen used on the cages was of about the same mesh as ordinary window screen and extruded all but the smallest insects, A little less light and wind might have been detrimental to seed setting inside the cages but could have hardly made the enormous difference indicated, Probably pollinating insects are of more importance in clover seed yields than has been realized. Dr. H.A. Scullen, Entomologist at Oregon State College, spent almost a week making sweepings and studying insect population in seed fields throughout the county. This study was made to serve as a basis for working out a proposed research project on the effect of insects on seed yields.

Box 03	546	Dairy Husbandry in Malheur County. Activities of the county agents have increased over the years which has included the organization of a dairy herd improvement association. The organization was completed in 1940. At the start of the association only 26 herd owners with 16 days of testing had agreed to membership but this was gradually expanded until 34 herds with 24 days of testing was reached.
Box 03	547	Owyhee Dam located in Malheur County, was constructed in 1935. In the spring of 1936 the Owyhee reservoir was filled to capacity and a great deal of water had to be let through the dam. There was enough water wasted to have practically half filled the reservoir again. There now remains in the reservoir over six hundred thousand acre feet of usable water, this, in a year when run-off was about normal. When the reservoir is filled to capacity there is practically a two year supply available.
Box 03	548	Land clearing operations on the vale project. Each year the Agent arranges for a number of fertilizer trials for the purpose of gathering data which may be of value at some later date, In 1932 the trials of super-phosphate on red clover and alfalfa was given.
Box 03	549	Richard Davis' calf at the end of a thirty-five mile ride by auto in Malheur County in 1924
Box 03	550	Coburg Farm labor camp. A view down one of the streets, ca. 1946.
Box 03	551	Coburg farm labor camp, Young girl does the washing while the rest of the family is out picking beans in 1946
Box 03	552	Filbert harvester. Filbert harvester of this general type helped solve the filbert harvest labor problem in Lane County, ca. 1946
Box 03	553	Filbert harvester, Filbert harvester of this general type helped solve the filbert harvest labor problem in Lane County, ca. 1946
Box 03	554	Equipment demonstration of land leveling on September 9, 1947 by the Linn-Lane Soil Conservation District cooperating with the Oregon State College Extension Service and equipment dealers. Large land scraper plane demonstrated by the BE-GE Manufacturing Company
Box 03	555	Equipment demonstration of land leveling on September 9, 1947 by the Linn-Lane Soil Conservation District cooperating with the Oregon State College Extension Service and equipment dealers. Eversman land plane PL-12
Box 03	556	Nut harvesting machine. Filbert cleaning machine which nuts are subjected to a blast of air in the cage that takes out refuse and leaves filberts clean, excepting for husks that are removed in another machine. The labor shortage during the war followed by low prices of filberts forced filbert growers with large acreages to develop nut harvesting machines.
Box 03	557	Filbert harvester that is pulled by a tractor and operates satisfactorily.
Box 03	558	Dean Schoenfeld of the Oregon Experiment Extension
Box 03	559	A.A. Reed, ca. 1924, County Extension Agent
Box 03	560	J.R. Gurton and Hattie Mae Rhonemus presenting summary of 1951 4-H Club work
Box 03	561	Charles W. Smith addressing annual Council meeting, 1950
Box 03	562	Klamath potatoes, ca. 1937

Box 03	563	Farm Security Administration labor camp at Merrill for potato harvest workers. Three such camps were established in the Klamath Basin, one at Merrill, one at Malin, and one at Tutelage, California.
Box 03	564	instructions and demonstration on firefighting and how to make a fire trail by the one lick' method. Boys being trained by U.S. and State Forest Service, U.S. Indian Service, Klamath Forest Protective Association, and U.S. Forest Park Service, Klamath 1941
Box 03	565	Boys putting a fire trail around a fire which was started for this training purpose. They are using the one lick" method of trail building. These boys will be hired. During the fire season at \$105 per month and each agency listed in 564 will use the boys to make up their crews, Klamath, ca. 1941
Box 03	566	Loading automotive junk for salvage shipment in Klamath, 1941. One truck man hauled 265 tons of automotive junk from one of the old city dumps on a return load to California after hauling vegetables from California to Klamath Falls
Box 03	567	Hoist on truck used for loading a scrap. Firm shipped 7 such carloads of scrap iron from Klamath County during April, ca. 1941
Box 03	568	Central salvage depot for Klamath county, established at 6th and Commercial Its. All people who had salvage material to donate were asked to leave it in this scrap pile. Scrap was sold on sealed bids and money used to get in more scrap and balance divided among war activities.
Box 03	569	One scrap pile in Klamath Falls, showing some of the scrap gathered in official salvage scrap pile, 1941
Box 03	570	Shipping and sorting warehouse in Klamath, 1941
Box 03	571	Potatoes are dumped from the truck which brings them from the field on to this conveyor leading to the sorting machine, Klamath, ca. 1941
Box 03	572	Showing operations of the Packing Company. First-grade potatoes coming over the grader after off-grades are removed, Klamath, ca. 1941
Box 03	573	Sacking and weighing one of the sacks of potatoes off the end of the grader, Klamath, ca. 1941
Box 03	574	The loading platform where an average of one car of potatoes every 55 minutes is being filled, Operations of the Packing company, Klamath, ca. 1941
Box 03	575	Car of U.S. No. 1 Klamath netted gem potatoes headed for San Francisco, ca. 1941
Box 03	576	Potato storage, ca. 1938
Box 03	577	Potato harvest, Klamath county, ca. 1932
Box 03	578	Home-built equipment, 12-foot cutting bar and curlers for harvesting small seed on Geary Bros. Ranch, Klamath Falls.
Box 03	579	Cutting bar and equipment in operation showing excellent way in which curlers windrow, and the clean cutting of the 12-foot sickle bar in Klamath county
Box 03	580	Tin fences used in grasshopper control in the Upper Klamath Marsh. Tin 14" high with holes in the ground every 50 feet. This proved particularly effective in control operations, ca. 1937

Box 03	581	Tin fences were built in a V shape in advance of moving hordes of grasshoppers, Klamath County, ca. 1937
Box 03	582	Shows a few grasshoppers taken in one of the many holes used with tin fences in the Upper Klamath Marsh, ca. 1937
Box 03	583	Shows typical pit 50% filled with hoppers. Close examination would show hoppers falling into the pits in a constant stream, similar to running water. A total of 92 pits were dug which captured 3,056 cubic feet of hoppers, totaling about 3,000,000,000 hoppers, as estimated by measuring one cubic inch of small hoppers. Fences and pits were particularly important in trapping large quantities of hoppers and aided poisoning operations by bunching hoppers in the areas behind the fences, poisoning efficiency being increased several hundredfold, ca. 1937
Box 03	584	County Extension Agent W.B. Parker, discussing cooperative work for advancement of horticultural interests in Lane County
Box 03	585	Turkey Marketing cooperative, Klamath County, ca. 1931
Box 03	586	Harvesting potatoes, ca. 1927 in Klamath County
Box 03	587	Packing lettuce, Klamath Falls County, ca. 1924
Box 03	588	Loading sugar beets, Dairy Oregon, ca. 1924
Box 03	589	From sagebrush to potatoes. Malin Irrigation District in which farm lands are being rapidly developed from raw sagebrush land, ca. 1927, Klamath County
Box 03	590	Potato cellar, just one of the 60 cellars constructed within the past two years (1927). Total storage about 5000 sacks each, or 300,000 sacks, farm storage, Klamath County.
Box 03	591	Agricultural floats prepared for the Great Northern Railroad celebration, Klamath Falls, ca. 1928, celebrating completion of that line.
Box 03	592	First prize agricultural float, Tule Lake Community Club. Railroad celebration, Klamath Falls, ca. May 1928
Box 03	593	Road-side display of squirrels, killed with poisoned oats, ca. April 9, 1919 Klamath County
Box 03	594	Road-side display of 204 squirrels from six quarts poisoned oats, ca. April 12, 1919, Klamath County
Box 03	595	466 Squirrels from two acres, secured when crew put out poison. 398 quarts poisoned oats used on ranch of 400 acres, ca. June 12, 1919, Klamath County
Box 03	596	Judging team at Klamath County Fair, ca. 1921
Box 03	597	Silage Cutter, ca. 1921, Klamath County
Box 03	598	Silage Cutter used in filling silo, was operated by two horse power motor in 1921, Klamath County
Box 03	599	Burner used on Tule Lake, near Malin, Oregon, ca. 1923, Klamath County. Proved very effective at that time in districts where hoppers were bunched and where they did not take readily to the poison.
Box 03	600	One of the grasshopper burners in action, 1923, Klamath County
Box 03	601	Grasshopper burner in action near Merrill, Oregon, ca. 1923.
Box 03	602	One of the Grasshopper burners showing air and gas lines and method of encircling hoppers with fire.
Box 03	603	Grasshopper poisoning squad in Klamath County, ca. 1923

Box 03	604	Poisoning of a horse in Klamath County, ca. 1923
Box 03	605	Poisoning of a horse and two dogs in Klamath County, ca. 1923
Box 03	606	Flooding in the western portion of the Stanfield-Echo Meadows area and bridge approach washed out on highway just north of Buck's corner. Picture taken February 1, 1965 in Umatilla County
Box 03, 08	607	Looking south at the Walla Walla River toward Milton-Freewater during the flood of 1964-65, Umatilla County (print is also in oversize box 20x24 for P 20)
Box 03	608	Flood in Umatilla County in 1964. On the night of July 26, thunder storm activity south of the Umatilla River concentrated it's energies in an area near Nolin on Speare, Alkali, and Harris Canyon,- and upper Buttercreek. The resulting wall of water which thundered down Speare Canyon demolished a rural home, taking the life of Mrs. Ed Redman. Hardest hit areas was the city of Stanfield. Picture, looking east on the Stanfield Loopread, shows the waters of Stage Gulch rising in the town. At the peak of the flood, houses in the vicinity of the distant Vehicles, were surrounded with water 31 to 4 feet deep.
Box 03	609	No print
Box 03	610	Leaf Cutter bee habitat in Umatilla County, 1963. Leaf Cutter bee is a very effective pollinizer of alfalfa. Alfalfa Seed growers are working to increase the populations of both the Leaf Cutter and Alkali Bees, to provide more pollinizers for the expanding acreage of alfalfa being grown for seed.
Box 03	611	Leaf Cutter habitat in Umatilla County, 1963. The bee collects alfalfa pollen, deposits it in the straw to provide nourishment for its larvae.
Box 03	612	Herbicide control in Umatilla County, 1962. Air sampling and water catching devices used by agent and crew to ascertain infiltration of volatile herbicide At left of photo is a small air vacuum pump, which pulled air through ether traps packed in dry ice, to measure presence of 2,4-D.
Box 03	613	First puncture vine weevils released in Oregon by Victor W. Johnson and Robert W. Every, Umatilla County, 1962. They released 200 Microlarinus lareynii weevils on the noxious weed, Puncture vine, on the morning of August 2, 1963
Box 03	614	Fire control, Washington County, 1943. Equipment such as the one pictured was secured by many combine operators to carry on their machines. Several fire units also had these hand outfits as part of their equipment.
Box 03	615	Fire control, Washington County, 1943. A view of some of the equipment collected by a fire crew.
Box 03	616	Eastern Oregon experiment station Horse barn & Machine Shed, County of Union, ca. 1942
Box 03	617	A typical field scene of the type of land suitable for the production of Austrian winter peas, Union County, ca. 1941
Box 03	618	Field pictured yielded 1750 pounds net of Austrian winter peas per acre. The average wheat yield per acre for this type of land averages less than 30 bushels, Union County, ca. 1941

Box 03	619	An excellent job of harvesting Austrian winter peas results from the use of the "pick-up" type reels, Union County, ca. 1941
Box 03	620	No matter how flat the Austrian winter pea vines may lay in the field, the "pick-up" reel gets them. This 12-foot outfit is doing a splendid job, Union County, ca. 1941
Box 03	621	Harvesting Austrian winter peas in bulk, with a 16-foot Holt combine, Union County, ca. 1941
Box 03	622	Sacking Austrian winter pea seed requires buld equipment on combines, Union County, ca. 1941
Box 03	623	The average combine will harvest from 10 to 16 acres of standing Austrian winter peas per day in 1941, Union County
Box 03	624	Austrian winter pea seed harvesting scene in the Sand Ridge area, Union County, ca. 1941
Box 03	625	Pea seed sacked on the combine is ready for delivery to the fumigation and cleaning plant, Union County, ca. 1941
Box 03	626	Hauling Austrian winter peas seed from the field is a two man job in 1941. Each burlap bag contains an average of 140 pounds of peas. This part of the war crop production program is not a woman's job, Union County
Box 03	627	Field run peas stacked in the vault awaiting fumigation. Methyl Bromide is used in fumigation for pea weevil, Union County, ca. 1941
Box 03	628	After the vault is filled with peas it is sealed air tight to prevent the escape of the deadly poison gas. When fumigation has been completed gases are removed by means of suction fans, Union County, ca. 1941
Box 03	629	Austrian winter pea seed cleaning equipment and crew in operation, Union County, ca. 1941
Box 03	630	An excellent quality of Austrian winter pea seed is produced in Union County, ca. 1941
Box 03	631	Cotton bags are used for the shipment of Austrian winter peas to the South. Each bag contains a net weight of 100# of pea seed, Union County, ca. 1941
Box 03	632	Tons of Austrian winter pea seed ready for shipment awaiting returns of purity test. Storage space becomes congested Union County, ca. 1941.
Box 03	633	Each bag of peas is tagged to show germination, purity, net weight, lot number, where grown, weed seeds present and date fumigated, Union County, ca. 1941
Box 03	634	Loading Austrian winter peas for shipment to the southern states from Union County, ca. 1941
Box 03	635	Austrian winter pea seed screenings and cracked peas stacked and waiting return to the farm for livestock feed. Analysis shows protein content between 23 and 29 percent, Union County, ca. 1941
Box 03	636	Union county collected and prepared for shipment 1006 tons of scrap metals between June 1, 1942 to November 15, 1942. Two hundred tons additional are assembled in the county
Box 03	637	Scrap rubber drive in Union county netted 150 tons, WWII
Box 03	638	First portable hay baler in Union County, totalled 750 tons harvested in 1940
Box 03	639	Union County Cooperative Creamery located at Union, ca. 1938

Box 03	640	Prof. G.R. Hyslop of the Farm Crops, examines late planted seed flax in July 1938
Box 03	641	Blown out field which required re-seeding, Union County, ca. 1934
Box 03	642	Dirt drift from wind erosion, Union County, ca. 1934
Box 03	643	Ladak in rows harvested with a self-rake reaper in 1935, Union County
Box 03	644	Implement used on #643 harvesting, Union County, ca. 1934
Box 03	645	Range ewes (females) in winter quarters for early lambing, Union County, ca. 1930
Box 03	646	O.T. McWhorter, Extension Horticulturist, pruning a young cherry tree, Wasco County, ca. 1934
Box 03	647	4-H Club members assembled for crops judging demonstration, Criterion, ca. September 5, 1931
Box 03	648	Two nurseries in Wasco County, ca. 1926. Purpose of these nurseries is to get information on the behavior of new and promising grain varieties being developed at the Moro and other experiment stations and to determine which grain varieties are most adaptable to Wasco county conditions. The picture shows ripe grain samples wrapped ready to take to Moro in Experiment Station car, D.C. Smith, third from left, is acting O.A.C. Farm Crops extension specialist
Box 03	649	The Union Pacific railroad in cooperation with the Oregon Agricultural College ran a livestock demonstration train over its Eastern Oregon lines last April, 1926. Shown is the county agent driving the first prize six horse team at the Southern Idasco County Fair
Box 03	650	Union Pacific Livestock Demonstration Train in 1926 in Wasco County, over 200 people passed through demonstration cars, inspecting charts and livestock at Maupin. The train was an hour late and a number left before the speaking started.
