Photograph album, circa 1905-1910

1 volume; 1673 photoprints

Album is loosely organized into subject groupings. It consists of cyanotype photos of orchards, fields, vineyards, greenhouses, irrigation, canneries, and packing houses in Oregon, Washington, and Idaho. Many of the images were taken at Oregon Agricultural College. The album also includes images of fruit, vegetable, and nut varieties; diseases; and grafting techniques. The

Photograph numbers P90:806 through P90:942 were transferred to the Archives by the Horticulture Department in August 1992 (accession 92:038). These photographs document research on tree fruits (primarily apples and pears) by Edward Maris Harvey in 1918-1926. Harvey's primary research interest during this period centered on the chemical and physiological factors associated with tree fruit bearing and cultural practices such as pruning.

Other numbers shown on the original enclosures are indicated in parentheses. Photocopies of the original enclosures are stored in the central file for P90. Most of these items are glass negatives.
